

DIALECT COMPLEX WORDS WITH THE SUBJECTIVE RELATION OF THE COMPONENTS IN THE UZBEK DIALECTS OF KARAKALPAKSTAN		Linguistics Keywords: dialect, Uzbek dialects, semantically variety, lexical unit, dialect compound words, types of dialect compound words, homonymy.
Ibragimova Umida Yuldashevna	Teacher of Nukus State Pedagogical Institute. City Nukus, Uzbekistan.	
Abstract		

The given article is devoted tone the scantily explored problems of dialectology of Uzbek language – the analysis of forming complex dialecticism with subordinating relationship of components is Uzbek dialects of Karakalpakstan. On the basis of analysis the number of linguistic materials is distinguished the productive ties and fictive ways of forming complex dialectal words: noun + noun; noun=adjective; numeral + noun and etc.

In dialect word formation, along with affixed formation, complex words occupy a large place (5: 2007.5-6). In the Uzbek dialects of Karakalpakstan (hereinafter, Uzb.DK), dialect compound words are widely represented, the components of which are in a subordinate relationship. However, the nature of the design of the components of such additions does not represent uniformity. Thus, the relationship of the components of the complex word *дәвсандық* (Khodzh., Kipch., Nazkh.): *улларджа* (Sarb., Shorh., Elk.): *нәҗән арча* (Kung., Noise., Kanlk.) “Big chest” is attribute, i.e. the first component acts as a definition of the second component, while the relationship between the components of the compound word *йәчк(и)әмәр* is a type of lizard (Khodj, Mang., Kipch., Bibz., Bern.); *иәшиәкәми* (Mang., Bern., Bibz., Kilchb.): *әшиәкәми* (Turk., Elk., Sarb.) - ‘allergic disease’ is complex, objective, i.e. the first component acts as the object of the second. Such complex words in Turkology are usually called addition with attributive and complementary component relationships. The latter also includes compound words with a circumstance connection (1: 1982,20,21,82). Each of these types of addition with a subordinate ratio of components in Uzb.DK has several types and models. However, all of them, in the lexical-grammatical and semantic terms, represent a single whole with the dialect semantics.

For complex dialect words, the following features are characteristic:

1. Most of the complex dialect words proper do not contain dialect formations, each component of which is used in the literary language, without forming complex words in it: *көрпәйорынджса* ‘third alfalfa shoot’ (Turk., Sarb., Elk.) (Hodge., Kung., Kankk, Shamn), *ийткөйләк* ‘first shirt, newborn child’ (Kung., Kanlk., Noise., Hodge);
2. The same words of a literary language form many dialect complex words proper: with the word *aq* ‘white’, formatted: *акбаскын* ‘ground drift’ (Kung., Kanlk., Noisy.), *ақбикәч* ‘millet’ (Kung.), *ақбиләк* ‘beauty’, *дилавар* ‘orator’, ‘improviser’ (Khodj., Kipch., Kung.), *акбүкләм* ‘white chintz’ (Hodge., Nuk. Nazkh., Kipch.), *қарасан* ‘cattle disease’ (Kung. , Takrk., Nazkh.), *ақмарқа* ‘bream’(Kung., Kanlk., Noisy., Khodj., Kipch., Nazh., Takrk., Bibz., Bern.);

3. In the formation of dialect proper complex words are involved words of the literary language, and dialect words:

a) the first component is a literary word, the second is a dialect: *төміржасаба* ‘vila’ (Khodzh., Kung., Kipch.), compare. *a toad* is a device for pulling out hay from a stack of *мәрәзчөп* ‘weed’ (Khodj., Kung.), *қолжсан* “small aryk” (Khodj.), *хамыртұрыш* ‘yeast’ (Kung., Noise., Kank., Kipch., Mang.);

b) the first component is a dialect word, the second is a literary word: *ғөджәқарын* (Khodj., Kung.), *пөлкәнан* ‘a loaf of bread baked in a bakery’ (Khodj., Nuk.): *көмпәйнан* (Kung., Noisy., Kanlk.), *сәңсәң постын* ‘sheepskin coat (fur coat) is made of sheep skin’ (Khodj., Kipch., Mang.);

4. As part of a number of dialect complex words, borrowed words are used:

a) the first component is the borrowed word: *шүрчай* ‘tea with milk’ (Mang., Bibz., Bern., Naym.) from Persian “shir” ‘milk’, *лампамай* ‘kerosene’ (Khodj., Kung., Kanlk., Kipch., Bibz., Bern., Nazh.) from Persian Neft (2: 1965,113) *тиштабан* ‘working boot with a low heel’ (Khodj., Kung., Kanlk., Shumn.), *үәхсүе* ‘winter watering of the field’s water’ from the Persian *yah* ‘cold’ (Khodj., Bibz., Bern., Sarb.);

b) the second component is the borrowed word: *аиқәди* ‘pumpkin’ (Turtk., Elk., Sarb.), from Persian *kədu*;

c) compound words consisting only of borrowed words: *найтаба* ‘footcloths’ (Bern., Bibz., Kipch.) - from Persian *pay* leg, *tofdan* - wrap, (2: 1965,113), *әпбәиәрә* ‘view, appearance’ (Khodj., Bibz., Bern.) from Persian *афм+фишан* ‘face + appearance, look’, *ғәвгүм* during twilight, from tajik *ғовгүм* (*gov* – cow, *gum* – missing - (4: 1981: 113.) - the time when it is difficult to find the missing cow in the dark, disappeared, *найанулы\айақ көнир* bridge for a pedestrian (Mang. (2: 1965.113.), (Khodj., Bibz., Bern., Sarb.) from Tajik ‘na, naï’, share ‘foot’, *нүл* ‘bridge’, *амақип* ‘nippers for removing coal” (Khodj., Kipch., Bern.,) from Persian *амаи* ‘fire’, *зур*, *зур* ‘take, take, hold’ (3: 1971: 113 -118)

5. As part of a number of dialect complex words, there are words that have historically undergone various structural changes (truncation, affixing, building up of the base, survival forms, alternating sounds, etc.):

a) as a result of changes in the structure of the dialectal components, variants of the dialect complex words appeared: *наистүн* ‘wooden stand’ (Turtk., Elk., Bern.), *тәкійәмәт* ‘felt’, *koshma*’ (Khodj., Kipch., Bern., Bibz.) from Persian *tag* – down, *namat* – “*koshma*”;

b) as a result of a change in the structure of one of the components of a compound word of the literary language, its dialectal variants arose: lit. *тычканкуйрык* - dial. ‘*тычканкуйрық*’ local species of carrots (Khodj., Kung., Kanlk., Shumn., Nuk., Kypch.). *табанан* ‘bread baked in a pan’.

As you know, among Turkologists there is quite a bit of discrepancy according to the principles of research and the classification of complex words. We adhere to the classification of complex words proposed by F. Ganiev (1: 1982, 31).

Dialect complex words in Uzb.DK differ in various types of dialect compound nouns, some of them are unproductive:

Type "noun + noun": *дарагач* 'shaft for drying things' (Khodj., Bibz., Bern.) *хыначон* 'name of the children's game' (Kung., Kankl., Khodj., Nazkh.), *кәрийсорақ* 'remaining grain on the current' (Khodj., Kung., Kankk.);

Type "noun + derived noun"; *баисалма* 'head *aryk* from Chigir' (Bibz., Bern.,..), *нантуврама* 'type of food', *темирсувлық* 'bit' (Khodj., Kipch., Bern.),

Type "noun + adjective *иçқара*, *йүзиқара*, *кәвниқара*, *йолыбұзық*, *кәвнийарым* 'offended', 'without mood' (Mang., Kilchb., Bibz., Bern. Kilchn.);

Type "root adjective + noun": *қаққурт* 'white cheese' (Khodj., Kung., Kanlk.), *қазәрик* 'dried apricots, essential apricot', *җарамчөп* 'common name for weed' (Khodj., Kung., Kankk.), *йағайом* (Turk ., Elk., Bern., Bibz.), *кызылмазыз* 'melon variety' (Bern., Man., Kalk.), *қарапочақ* 'melon's disease, *ләккитавақ* 'small glazed cup' (Bibz., Bern., Elk. , Sarb., Shorh.);

Type "adjective + adjective": *қаракип* is very dirty (Kipch., Bibz., Bern., Nazkh., Khodj.), *карачунак* 'wheat variety', *қаракотыр* 'cattle disease' (Khodj., Kung., Mang) *сарапрув* 'jaundice' (Khodj., Kung., Kanlk., Shum.).: *сармас* (Mang., Kilchb., Bibz., Bern. Sarb.), *қарақатты* 'kind of melon' (Khodj., Kipch., Kung.);

Type "derivative adjective + noun": *зыйаллыджәндик* 'predators' (Khodj., Noise. Kalk., Kung.), *қаллықөл* 'carrying lake' (Kanlk., Kung., Khodj.);

Type "numeral + noun": *үччәйрәк* 'one's area '(Kipch., Mang., Nazkh., Khodj.), *үчәм қозы* (khodj., Kipch., Nazh., Mang., Bibz.), *бәшибармақ* 'type of food' (Khodj., Kung., Kalk., Nuk.),

Type "numeral + participial form": *бирқырқар* 'late-lamb lamb (Chap.), *биртувған* 'pedigree camel': *тишиарған*, *тишибузған:ди:ш бузан* 'dish';

Type "verb + noun": *буктизә* 'device for training horses' (Kung.), *уртоқмақ* 'truncheon' (Naym.), *еcepсоқ* 'crazy ', bad' (Khodj., Nuk., Kanlk., Kung.);

The following types are found, many of which are unproductive:

Type "adverb + adverb": *дүстөмән* 'down' (Kung., Kanlk., Khodj.), *нәгәндә* 'occasionally' (Kung., Kanlk., Nuk.), *йәңәвәл* 'first' '(Mang., Bibz. , Bern.), *атамзаман* 'long ago' (Kung., Kanlk., Nuk., Khodj.): *әлмисақ* (Mang., Bibz., Bern., Sarb.);

Type "numeral + adverb": *бирзатамтта / бир майданда* "at one moment" (Bern., Sarb.), *йәкибаштан* "indisputably", "unconditionally" (Kipch., Khodj. Bibz., Bern.) , "unconditionally" (Khodj., Kipch., Nazkh.).

Type "noun + noun": *жылдың жылы* 'annually', *айағусты* 'in a hurry' (Khodj, Mang., Bibz., Bern.);

There are a number of more unproductive types of complex dialectal adverbs: *мұздай аман* 'safely' (Uzun.), *мұз қаралғасөк* 'very cold' (Khodj., Kipch., Bibz., Mang.), *хәддән тыш* 'beyond strength'(Hodge., Nuk., Bibz., Bern., Mang.)

Dialectic complex words related to the rest of speech are also unproductive. So, with the participation of the pronouns formed: *йәчкайда* 'nowhere' (Khodj., Kipch.), *йәчким* 'no one', *йәссәм* 'nothing', (Khodj., Kipch., Nazkh.,), *незат* 'what is' , *йәчким* 'no one', *кимтуртты* 'name of the game children' (Khodj., Kipch., Bibz.), with the modal word *әжсоқ – урыжсок* the humor 'no desire', *қәмийоқ* 'decent'

The first components of dialectal complex words with the attribute relations of components are the words of almost all parts of speech, which differ only in their productivity. In the lexical terms, the first components of compound words belong to different categories. This can be illustrated by the example of dialect compound nouns, the first components of which denote the following:

1. The form of the object, expressed by the second component: *атжасал* 'flaw'. (Khodj., Nazh., Bibz.). "horse + mane", i.e. a narrow strip of grass, missed when mowing, resembles a horse's mane; *аюджылан* 'large poisonous snake' (Kanlk., Kung., Noise., Khodj.), lit. bear + snake; *атаевыз* 'pliers, tongs, vise' (Khodj., Kipch., Mang., Bern.) it is *horse mouth*;
2. The material of the object expressed by the second component: *мисстаба* 'tray for a samovar' (Bern., Bibz., Nazh., Khodj.) "honey + pan", i.e. frying pan (tray) made from honey. Compare *майстабак* 'cup made of clay' (Khodj., Kung., Kipch., Mang., Bern.) made of clay, *чалықора* 'shed', 'pen', built of reed or rod (Khodj. Kipch. Nazh., Kung., Kalk.);
3. Purpose of the subject: *әжсайнамаз* 'nightmare for prayer' (Turt., Bern., Nazkh., Khodj.), *аяққап* 'footwear' (Kung., Kanlk., Noisy., Khodj.), *ийнағац* 'yoke' (Khodj., Kipch., Kung.), *аитакта* 'board for making doughs';
4. Quality, property of the item indicated by the second component: *қақчәккә* 'thin, weak' (Khodj., Kipch., Bibz., Bern.), *ҳарамчөп* 'common name for weed' (Khodj., Kipch., Nazh.);
5. The position, the state of the object, expressed by the second component: *қышамқозы* 'Lamb of the late' (Bern., Bibz., Mang., Khodj.), *жуги्रмә қачар* 'heifer' (Takrk.), *ақабасуғ* 'abundant water' (Khodj. Kipch. , Kung., Mang.), *қарамай* 'pitch' (Khodj., Nazkh., Kipch., Kung.);

6. Place of origin, origin of the item indicated by the second component: *ширгурич* 'rice porridge with milk' (Turk., Sarb.), *найман жүвәри* 'view of zhugary' (Hodge., Mang., Kilchb.), *бұхары баши* 'type of winter wheat. ';

7. The time of action of the subject, indicated by the second component: *күн түн* 'all day', *таңыртәң* 'tomorrow' (Turk.), *таңмә:л* 'early in the morning' (Kung., Nazkh., Nuk.), *талтүши* 'exactly lunch time' (Khodj., Kipch.); *чанқайтүши* (Kung., Kanlk., Nuk., Takrk.);

8. The species ratio of the object, expressed by the second component: *бүргәбалық* 'small fish' (Khodj.), *донызот* 'dark brown weed color' (Khodj., Kipch., Kung., Kanklk.), *дженкесуө* 'water in the head *aryk*' (Kung., Kanlk., Khodj.);

9. The result of the action of the subject indicated by the second component: *таскәкил* 'firm surety', *алөпкә* 'lung disease', *нахтамай* 'vegetable oil' (Bern., Khodj., Bibz.): *ақмай* (Nuk., Shumn., Kanlk., Kung.), *доңмай / тоңмай* 'fat', *сүтәмгән* 'six month old baby '(Khodj., Kung., Kanlk.);

10. The subject of possession expressed by the second component: *көзәрии сувы* 'first irrigation for cotton field' (Mang., Bern.), *морғай оты* 'grass growing on salt marsh' (Khodo., Nazkh.), *чи:ит майы* 'cottonseed oil' (Turk., Bern., Elk.);

11. The volume, the quantity of the item indicated by the second component: the *бүр кулак* *суы* 'small water for irrigation' (Tarb.), *килакаса* 'liter drinking bowl' (Kipch., Khodzh., Nazkh.), *бүр қыйтак джер* 'one piece of land' (Djuv.);

12. The color of the object, expressed by the second component: *алабарыс* 'clay terrain', *ақбайпак* 'general disease of cattle' (Kilchb.), *аққүв* 'swan', *бозторғай* 'bird', *ақбаши* 'grass growing on the saline', *карақаш* 'ethnonym' (Hodge., Nuk.), *кара тырышмай* 'cholera', (gkt), *көзәгии* 'vegetable growing';

Such complex words are mainly complex verbs and nouns, between the components of which are observed objective and adverbial relations.

In the formation of complex (compound) verbs from different parts of speech, nouns and adjectives are most often the first components, and the auxiliary verbs are the second components. In conjunction with the nominal words, the auxiliary verbs are *бол-* "be", "stand up", *сал-* "put", "lay", *қыл-* "do", *эм-* "do", less productive, *ал-* "take", *чык-* "out", unproductive *қой-* 'put', *йаса-* ' do', 'create ', *кел-* 'come', *бар-* 'to go', *ач-* 'to open', *йүр-* 'to go', 'to walk', *қал-*to stay, *түши-* 'to go down' and others. F.A.Ganiev calls them "functionally auxiliary verbs, meaning that they are full-valued verbs, only in the process of formation of complex verbs appearing as auxiliary verbs" (1: 1982.88).

The noun type + verb *бол-* has the meaning 'do', which is expressed by the first component: *пүчбол-* 'wither', 'wither' (about cereals), *әзәбол-* 'rationally', *бақна бол-* 'obey'.

The type "noun + verb *сал-*" with meaning to produce an action expressed by the first component: *ам сал-* 'to conduct secret negotiations', *бас сал-* 'to speak immediately', 'to beat about the mortgage' .

Type "noun + verb *қыл-*" with the meaning "to accomplish what is expressed by the first component": *зыдан қыл-* 'cause harm', *абай қыл-* 'take care', *төнкөриш қыл-* / *авдарыш қыл-* 'turn over'.

The type "noun + verb *эм-*" with the meaning "to produce an action or process expressed by the first component": *дачуи эм-* 'mourn', *ҳаз иэм-* 'to happy', *мыңқ иәтмийди* 'silent', *әнүәт* 'excuse'.

In summary, the types of dialect complex words with a subordinate ratio of components, are widely represented in Uzb.DK, differ in terms of lexical and semantic structure and interrelationship of components. In the material studied, the productive types of complex nouns with an attribute and complex verbs with a complementary relation of components are mainly presented. Complex adjectives and adverbs are less productive. Homonymic and synonymous relations are also established between complex words that have dialect and also dialectically nationwide.
